of troops to the scene of the recent outbreaks of Albanians.
Offilal advices also confirm the reports of the wounding of the Russian consul at Mitrovitas during the unsuccessful attack which the Asibanians made on that town. The attacking party numbered 2000 men, representing the element opposing the plan of reforms, which the powers jointly formulated and which Turkey accepted. The officials here consider that the Albanian opposition to the reforms creates a serious complication, and they accept the Sultan's action, dispatching large reinforcements to Albania, as evidence of the Turkish governments determination to carry out the reform project.

Another official dispatch announces that Russian has given Bulgarias a definite and supparting the Bulgarian settlers in Turkey to the Bultan's reforms brings on a Turkish Bulgarian conflict, Mulgaria must not count on any support, moral or material, from Russia.

The rapid lowering of the barometer Thursday morning caused Dr. Hyatt to move an amendment to his prediction for April showers.

The barometer went down hurriedly, and did not stop until it was about as low as it could get.

That fact might upset the prediction, he baid, might mean showers and thunderstorms with a

With this point noted, the following prediction is given for what it may be worth, with an en-largement on the

Much cooler does not mean so dredifully cold. The temperature is fairly high as it is. This morning at 7 o'clook it was 64-8 degrees higher than Wednesday.

SAN FRANCISCO, April 2.—The interstate commerce commission is coming to this state, and next Tuesday will begin its sessions in Los Angeles. The main matter to be investigated is the alleged pooling arrangement between the Southern Pacific and Santa Fe companies, which, it is charged, divided the California traffic to the disadvantage of shippers. The Southern California Fruit Exchange and certain other by shippers of citrus fruits, who were represented in a company known as the Consolidated Forwarding Co., are the plaintiffs in the action, and both the Southern Pacific and Eanta Fe are made defendants. Just what effect the formation of the shipping combine in southern California will have on the case before the commission is a matter that is causing quite a little speculation at present.

The combine effected by President A. H. Naftager of the Southern California Fruit Exchange, whereby all of the citrus fruit shipping interests in this state have been consolidated in one big corporation is a new factor in the situation, and one which the railroads will have to take finto consideration. It is believed by some that the power which Naftager will now wield as the absolute dictator of the shipping interests wil enable. In the one force some of

BROADWAY AND FRANKLIN AVENUE.

Tenth Ward Candidate Hopes to Wield Gavel in the House.

HAWES AND LEMP UNITE IN GIVING HIM SUPPORT

Speaker Fontana Known to Aspire t Re-Election, but Tip Is Out That Hs Is to Be "Rolled."

If the Democrats capture next Tuesdays election, it is considered practically certain that William H. Hughes of the Tenth ward will succeed to the speakership of the House of Delegates.

The slate makers have gone over the list of available candidates, and Hughes seems to be held in the highest favor. The fact that Harry Hawes has given unequivocal indorsement to the Tenth ward statesman is another indication of what will happen, provided Mr. Hughes and a majority of the Democratic House nominees

Notwithstanding the excellent opportunity presented, the Republicans seem to have entered the campaign in a half-hearted way, and their failure to put up candidates in the Third, Fourteenth and Fifteenth wards is construed as an indication of the weakness of their organization.

In the wards mentioned, the Democrats have not nominated men who give hope of reforming the House.

Charles Lemp is giving Hughes splendid stoport and as his opponent, Frank N. Sir mons, is not considered very strong in his own party, the brewer's candidate has the best of the situation thus far.

Tefferson Club Is Helping Now.

Hawes and Lemp quurreled two years ago over Hughes, and the former denounced him in the most bitter terms. Political affairs have changed somewhat since that time and now that Hawes and Lemp flave made up, the Jefferson Club president is willing to do all he can to help out Hughes, of whom he said "he has the merit of being intelligent and will not reflect discredit on St. Louis."

Mr. Hughes has always represented the Lemp interests in the ward, and while he has been identified with politics nearly all his life he promises if elected to work for a business-like administration of municipal affairs.

As to the speaker pro tem, the Democrats are willing to let two or three men "pull straws."

The most likely candidates are J. J. O'Brien and Dan F. Mechan, whose election is thought to be a certainty.

"Johnnie" Fontana would like to succeed himself as speaker, but the powers that be say that he "must be rolled."

Leaders on both sides predict that a total of 5,000 votes at the most will be cast. This means that 58,000 persons will fall to go on record against a bad House of Delegates.

Of the total estimated vote, the Democrats count on getting between 35,000 and 38,000. Hawes and Lemp gaurreled two years

Five Speeches, Luncheon, Banquet and Public Meeting on the Program.

GREAT CROWD GREETS HIM AT HIS TRAIN IN CHICAGO

Fifteen Hours of Rush and Excitement Give Him a Foretaste of the Sixty-Six Days Before Him.

CHICAGO, April 2.-President Roosevelt's sixty-six day tour of the West began in sarnest here today when he stepped from the Pennsylvania special at 8:45 o'clock and was received by Mayor Harrison and a special reception committee, not to mention a huge crowd which made its unofficial presence known by cheers which could be heard across the river.

The program prepared for the President's 15-hour stay in this city was repeated to him by Charles S. Deneen, chairman of the reception committee, and served to reimnd him of the strenuous nature of the life he will be called upon to lead the next two

months.

The program, to which the President gave his hearty approval; provided for an immediate run to Evanston, 17 miles to the northward, and a brief address there to the students of the Northwestern University; luncheon at 12:30 at the Auditorium Annex, a trip in the afternoon to the University of Chicago, where the President is to receive the degree of LL. D., and make a brief speech; a banquet at 6:30 at the Auditorium, he being the guest of 10 citizens, at which he will respond briefly to a toast, and a meeting in the evening at which the President will deliver one of the most significant addresses on his tour, on "The Monroe Doctrine."

President Pleased by Great Crowd.

by Great Crowd.

President Roosevelt smiled his appreciation when informed by Mr. Deneen that every available foot of space in the Auditorium Theater had been assigned and that hundreds of persons were clamoring for seats who could not be accommodated. While the greetings were being exchanged and members of the reception committee and the Evanston hosts presented by Mayor Harrison, the President's special train was switched to the tracks of the Chicago, Milwaukee & St. Paul road for the run to the North Shore suburb.

As the guest of President James and P. D. Sheppard of Northwestern University. F. P. Crandon, G. B. Jenkins and J. C. Shaffer of Evansville, the presidential party, within a half hour after arrival, again entered the cars and amid the cheers of the assembled crowds and the waving of hats, the train pulled out of the station. At Evanston the President was greeted by Mayor J. A. Patten and then, headed by a detachment of cavalry from Fort Sheridan, and a millitary band, the party made its way through lanes of school children on the streets and of capped and gowned students on the campus to the steps of Lunt Library. As the University grounds were entered, a salute of 21 guns was fired.

"I had often heard of Peruna as an excellent tonic, so I bought a bottle to see what it would do for me, and it certainly took hold of my system and refuvenated it, and in less than two months I was in perfect health, and now when I feel worn out or tired, a dose or two of Peruna is all that I need."—Mrs. J. WASHINGTON, April 2.—At 3 o'clock the morning after the Corbett-McGovern fight the White House watchman was sitting in the entrance corridor. A call-bell rang violently. The watchman looked at the indicator and jumped two feet in the air.

It's the President's room," he exclaimed. He rushed upstairs. The door to the President's room was ajar.

He rushed upstairs. The door to the President's room was ajar.

"Is anything the matter, Mr. President?" he asked.

"No," said the President, "but I wish you would call up one of the telegraph offices by 'phone and find out who won the fight at San Francisco."

Five minutes later the watchman came back and told the President that Young Corbett had won in 11 rounds.

"That is too bad." said the President, "Too bad. I thought McGovern would win. Thank you very much. Good-night."

PRESIDENT RODE IN ENGINE CAB

Special to the Post-Dispatch. PITTSBURG, Pa., April 2.—President Roosevelt viewed the scenery around the famous horshoe curve yesterday afternoon from a seat in the cab of a locomotive attached to his special train, and after a ride of about fifty miles expressed him-self as delighted with his experience. Two ensines were coupled to it ready to pull the heavy cars over the Allegheny Mountains and the President shook hands with the crews of each. He then climbed into the cab of the rear engine, No. 2408. In the cab with him were Secretary Loeb, Trainmaster A. Keiser, a special engineer, H. T. McCormick, and Fireman H. W. Hunter, As he took his seat the President remarked that, being a member of the Brotherhood of Locomotive Firemen, he thought he ought to take his turn at feeding the furnace, but he did not do so.

When Galitzen, the creat of the mountains, was reached the front locomotive was detached and the run to Seward was made with one engine. Here the President climbed down from his lofty seat, and after shaking hands with the engineers and firemen, went back to his car, rather dusty and grimy, but enthusiastic over his novel ride.

While the President's engine occupied the second place on the train, a tunnel seven-eighths of a mile in length was traversed, and, although the cab was protected with windows and doors, quite a quantity of smoke found its way in.

CARDUI LITERATURE

The Ladies' Birthday Aimanac and the Cardul Book contain letters from our who tell how Wine of Cardui has relieved them of every kind of female suffering.

The world knows little of the suffering and sickness of the women in American homes, and these little books are prepared to go into these darkened homes with their messages of health. From these books 10,000,000 women learn that Wine of Cardal perfectly regulates the menstrual flow, cures bearing-dow pains, ovarian troubles, leucorrhose, barrenness, and relieves the distressful suffering during motherhood and are enabled to treat themselves in the privacy of their own homes.

What can be more fascinating to any woman than the true life recry of scores of pa who tell the details of their restoration to health?

As a specific for female troubles, Wine of Cardui is certainly a superior modicine. I suffered for eight years with ulceration of the womb, and although my family physician prescribed different remedies, and I used a number of douches and washes, only to get worse, and finally gave up in despair, and decided that health would never be mine again.

Fortunately, this spring one of your little Cardui books was left, at my door. As I read how other sick women had been cured by using Wine of Cardui, new hope sprang up in my heart and I tried it.

I was very pleased to find that health came very soon, and at my next menatrual period the pains were greatly lessened, and within seven weeks I was well.

He Will Tell of the Actual Business of Managing a Great College and the Practical Problems Which Arise.

President Arthur T. Hadley of Yale will on Thursday evening give an address before the members of the University Club on "University Management." President Hadley says his remarks will be largely im-

"The request for an address," said Yale's president, Wednesday afternoon, "came somewhat in the nature of a surprise. I think that perhaps the club wanted me to give something of a more serious kind, but I told them that I had the general matter ready for an address which, while it would not be particularly instructive, might be entertaining. My remarks will deal generally with the guidance and andling of a university. They will be in the nature of a description of the actual business of managing a coilege like Yale—an account of the practical problems which present themselves in the everyday routine life of each department and with which a college president must grapple."

President Hadley has come to St. Louis from Milwaukee, and will remain here until Friday morning, when he goes to Chicago and Detroit.

"Presidential tours seem to be the thing now," said Mr. Hadley, "and I am having something for any specific business surpose, but am attending to Yale matters generally in each city I visit I am brought in contact with the alumniand the Yale associations, and there is always something to be both learned and imparted.

Companion at New York. Companion at New York.

NEW YORK, April 2—Miss Lena Hurley, who says she is the daughter of the Jostmaster-general of the Island of Barbadoes, has been excluded from landing in this country, not for lack of money, but because she is almost totally blind and entirely without friends or acquaintances here. She came to America to be treated by a specialist in Philadelphia and was accompanied by a Miss Allen, said to be the daughter of a wealthy Costa Rican planter, arriving a few days age on the steamer Capri. Miss Allen disappeared immediately after the arrival of the vessel and has not since been seen. Miss Hurley was found in her cabin awaiting the return of her traveling companion, and when a search failed to find Miss Allen the young woman was transferred to Ellis Island, as the only way out of the trouble.

City Hospital nurses and attaches, during a struggle to overcome Charles Williams, a delirious patient of giant stature, received several blows from his fist, but no one was seriously hurt. Panic prevailed among the other patients until the big man was subdued.

Miss Scott, the head nurse of Ward 9, was standing just outside the door when she heard some one moving about and saw Williams hiding behind a door as if to lie in wait for some one. She knew he was suffering from puenmonla, and that he was probably not in his right mind.

APRIL FOLL JOKE NOT RELISHED BY THE VICTIM

Vhen J. M. Driver Handed His Certificates for Inspection, Constable Took Possession Under a Judgment.

James M. Driver got nearly through Al col's Day without being caught in a joke out when he was caught late in the day it

was found. It was returned, as no property was found. Attorney John Menown, with offices in the Missouri Trust building, was engaged to collect the judgment without the knowledge of Driver, and when he received a note from Menown, asking him to bring certificates worth about \$2500 to his office to meet a prospective purchaser, Driver was not suspicious.

Menown had arranged with Deputy Constables Potee and McAuliff of Justice Griffir's court, formerly Walker's court, to be present to represent the prospective purchaser.

PILOTS WORK FOR AULD LANG SYNE

Sentiment Prevents Carrying Out Their Intention to Strike.

Officers of the Pilots' Association declared Thursday that the pilots would re-new their demands for an increase in wages, although they did not strike esday, as they had intended to do

if their employers did not yield.

March 1 the increased wage scale was demanded. Wednesday it became known that several of the packet companies had decided not to grant the increase. The pilots said they would not go out unless the increase was promised.

Five packets were advertised to leave in the increase was promised.

Five packets were advertised to leave in the afternoon. They were the first to depart during the day. An hour before the departure scenes on the leves were the same as usual, but the pilots were meeting and renewing their vows not to work unless they were to get more pay. Then they went down to watch the boats loading.

and Others to Quit Work. Three hundred men employed at the Vorld's Fair grounds have left their work in order to enforce their demand for more

pay.

The roofers, nearly 100 strong, failed to reach an agreement with the employers Wednesday. The men demanded a raise from 40 to 50 cents an hour and quit work when it was not given.

The men are needed to complete the preparations for the dedication.

The other strikers are employed under Civil Engineer Phillips. They presented demands Tuesday morning for an eight-hour day at 25 cents an hour. They had been working nine hours at 20 cents an hour.

Their demands were refused and the men walked out Wednesday noon.

BOY PLAYS, MOTHER DIES. en-Year-Old William Smith Did Not

Realize Parent's Condition. On tiptoe William Smith, 10 years old, walked about his home at 1416 Ohio avenue, fearful that he might wake his mothnue, fearful that he might wake his mother, who, although she was dying in her bedroom, was thought by the boy to be taking a nap. She had been ill for some time past, and her son was anxious that she should not be disturbed.

He went out to play, and was gone three hours. When he came back it was dark, and as he went about the house calling for his mother, he stumbled over the body, which was in the same place he had seen her lying when he went away.

Dr. R. J. Henry of 2286 Russell avenue said she had been dead two hours, and that she had died of heart disease.

Religious Issue.

'Then followed one of the most serious religious controversies that ever interested or excited the Buckeye state. I took with me more than 80 per cent of the members of my church, including all those of prominence and wealth, and established an independent church and very soon had the largest congregation in northwestern Ohio. A large church structure was erected, but this was soon outgrown, and on Sunday afternoons I lectured in a college hall before an audience seldom less than 2000. Now I come to one of the unpleasant incidents of my life. Here, could I live my life again, I would do exactly as I did 25 years ago.

'Maitthias Hestor, an old and wealthy seldont of Allance, who had been a memor of my original congregation, but who pad not followed me to the independent organization, made active war upon me. After repeated attacks he published in one of the town papers a letter which he said had been received by him, and which contained many libels upon me. I began sult for damages. William R. Day, now superme court justice, was my counsel. He advised me that because of the religious controversy which I had stirred up it would be almost impossible for me to obtain a verdict, but as he saw that I could place my case properly before the public he advised that the trial should proceed.

'The trial practically developed into a religious conflict, and it was filled with intense excitement for me, and I think, the entire community. Religious prejudices were aroused in an unfortunate manner, and it is because of that fact, and not because I lost the suit, that I regret the incident. I took up the practice of medicine in addition to my religious lecturing, and, as my practice increased. I branched out, and in 1890 came East, establishing an office in Philadelphia, and having as patients some of the most distinguished of men."

Dr. Flower adds that he had a stormy career of it as a physician, having had at one time 20 warrants served against him at Richmond. Va. He fought the battles of Christian Science healers because he believed they had the right to practice according to their beliefs.

He then became interested in business ventures and in the earl sightles became dentined with the firm of F. Shaw & Bros., tanners and leather merchants, with extensive stores and plants throughout New England and Canada. It falled with labilities amounting to \$14,000,000. All of his extensive investment was swept away, and, in addition, there was outstanding paper which he had indorsed amounting to \$10,000. This he etaims to have settled dollar for dollar.

THEIR FATHER IS WITH THEM ON LEARNING TOUR

A Tutor, With Maps, Books and Charts, Instructs Them in the Things Their Father Wants Them to Know as They Speed Along.

Kingdon and Jay Gould, heirs to the Gould millions, are studying railroad mangrement at the rate of 60 miles an hour. They left St. Louis at 8:45 o'clock Thurs day morning on a special train, over the Iron Mountain. A big table in the observa-tion room of their father's private car, "Missouri Pacific AI," was littered with maps and charts, showing the points of importance on the Gould railway system.

Mr. Huntsman, their tutor, armed with books and pictures, is describing to them the industries and comparcial features of the industries and the industries and the industries and the industries and the industries are industries and the industries and the industries are industries and the industries and the industries are industries and the industries are industries and the industries and the industries are industries and the industries are industries and the industries are industries and the industries and the industries are industries are industries and the industries are industries are industries and the industries are industries are industries are industries and the industries are i

The railroad system which the boys are studying contains ff.822 miles of track. It includes the Wabash, the Missouri Pacific, the Iron Mountain, the Texas & Pacific, the Iron Mountain, the Missouri Pacific, the Iron Mountain, the Missouri Pacific, the Iron Mountain, the Missouri Pacific, the Iron Mountain, the Mountain Iron Mountain Iron Mountain Iron Mountain Iron the Denver & Rio Grande and half a dozen minor roads, stretching altogether from the Atlantic to the Pacific and from the Lakes to the Guilf of Mexico.

The boys have been over a large part of the system several times, but the present trip is their first for making a study of it as they go along.

Their father, George Gould, the present head of the Gould system, is with them and between stops on the trip will spend much of his time at their study table helping them.

Where they will go only they know. They prepare no itinerary and parts of it are planned on the spur of the moment. They left Thursday morning for the Southwest, but it is expected they will swing back to Memphis before entering Texas.

Both the boys are tall and slender. They do not look strong, although polo is their chief amusement at Lakewood, their New Jersey home. They, were dressed alike in black suits and wore black Derby hats when they left St. Louis. Both the boys are almost as tall as their father.

The boys arrived at the station at 8:20 o'clock and immediately entered their car. Outside were Vice-President and General Manager Harding of the Missouri Pacific, Manager Cotter, General Passenger Agent Townsend and General Preight Agent Lincoln. They were waiting for Mr. Gould.

The special was scheduled to leave at \$:30, and it was exactly that time when Mr. Gould sauntered down the midway from th stationmaster's office. He wore theusual gray suit with the lapels, pulled out of shape from constant use of the pockets. He carried a roll of papers under his arm.

Just as his railroad managers prepared to greet him, h disappeared from sight down the passageway beside track 6, two tracts distanct from his train.

The managers started after him on a trot, waving their arms. Mr. Gould camly entered a Missouri Pacific train on track 6 in spite of efforts to tell him that was not his special.

"Iwant to look at it," he remarked. Then he walked through and told Genral Passenger Agent Townsend where improvements in the cars might be made.

"These vestibules ought to be wider," said he, as he stood on the rear of an observation car. Then he went inside to examine the lights and furnishings. In ten minutes he came out and began to shake hands with all the Missouri Pacific conductors and brakemen on duty in the station.

The special train was delayed 15 minutes, while Mr. Gould paid his imprompu visits. It pulled out at \$16 o'clock.

The tour is expected to last about two weeks.

Young Stouthard met Miss Louise Chausser where he was employed in East New York. His parents objected to his marriage to her. Yesterday, after an absence from home for several days, he wrote his mother that he and Miss Chausser had been husband and wife since last September. He inclosed the marriage certificate and said that he and his bride were coming to Lakeview to seek forgiveness.

When the elder Stothard went into the yard today he saw the dead body of a woman. Further investigation disclosed the dead body of this son in an outhouse. By the body of the young man lay an empty eight-ounce bottle that had contained carbolic acid.

LOUISIANA RICE AT WORLD'S FAIR.

One of the most interesting exhibits at the World's Fair will be Louisians's rice farm in operation.

In 1897 the quantity of rice grown was insignificant, but it is now a well-established and profitable industry. About 12,000 square miles of prairie land in southwest Louisiana, subject to pump irrigation at small cost, were chosen as the field of experiment. So successful has this been that the crop which before was small and uncertain is now large and sure.

In 1898 the new fields produced 118,000,000 pounds of rice, where little or none had been grown. In 1900 the area was doubled and expert mills were built.

nd great mills were built.

The industry promises to reduce the imports of rice to nothing. The year the experiment began the imports were 154,000,000 counds. In 1898 and 1899 they rell off to 98,650,000 pounds and in 901-02 to 75,000,000.

Hill proposes to span and China to St. Paul, where Mr. J. J. Hill proposes to stablish a large depot for the distribution of the cereal. If this is the property of the project. Louisiana alone can supply he country with all it needs at a lower price.

The Fair is to be largely an exhibit of processes. And among have the Louisiana process of rice production will be not the

ley? How high are they to build the leves so as to have them for protection? Every time there is high water they are found to be too low or too weak. It does seem strangs that they cannot realize that the system is wrong, and by the very fact of having the mud settle in the bed of the stream it raises it, and they will have to keep on raising the levees to offset it. They can make anything they like out of it by taking a correct way of doing it. By using the mud, permanent banks or the filling of the low lands alegg both courses of the Mississippi and Missouri can be created. The waters can be trained to give returns as well in utilizing the fall that is in the Meramec for cower purposes to that nothing will go to waste. How long is this to be dfilled into the ears of those that re vitally interested?

Arms of Guards at World's Fair.

To the Editor of the Post-Dispetch.

Fread in one of the daily papers that the guards of the World's Fair grounds would only be allowed side arms. I think that is not just right. What chance would the guard have with a revolver in the hands of a desperate mob? None at all. Your city would have a dead guard and an excaped guarderer and thief, and lots of trouble trying to catch him. I hope your worthy paper will try and heip this cause, as it helps all persons and things worthy of help. I am a woman raised here in the territory, and when I come to the Fair I will not depend on your guards to protect me from thieves with their side arms.

When we transformed our second floor into a great, modern department of

Stop Worrying About Your Nomination for President in 1904."

THE ONLY MAN WHO CAN DEFEAT YOU IS YOURSELF'

The Distinguished Party Leader Talks Plainly and Again Tells the President That He Is His Sincere Friend.

Special to the Post-Dispatch.
CHICAGO, April 2—"Mr. President, there s just one piece of advice I want to give ou. Stop worrying about your nomination in 1904 and put all your energies into discharging the duties of your office. If you do this you will be all right. The only

you do this you will be all right. The only man who can defeat you for the nomination in 1904 is yourself."

Walter Wellman, the Washington correspondent of the Record-Herald, gives the above as part of a recent conversation between Senator Mark Hanna and President Roosevelt. The correspondent says that between the President and the Ohio senator there exists a very frank and cordist understanding. The two men are warm friends. Each has a sincere regard for the other, and when it comes to a matter of important policy or politics there is no living man who has more influence with President Roosevelt than Hanna. Senator Hanna has resisted all the efforts of his friends to induce him to become a candidate, and there is now agt the stightest indication that he will change his attitude.

a candidate, and there is now agt the stilidites indication that he will change his attitude.

As President Roosevelt starts upon his great tour of the West, it may be well to record in a few words the judgment of him which Washington has formed. This Judgment is that he has earned his place in his own right. He came to the presidency under distressing circumstances. He was at once beset by prejudice and doubts. Older men resented his luck and predicted his failure. They said he knew little or nothing about public affairs, that the game was too large a one for him to play. They said he was a mere accident to the task which fate had thrust upon him.

At one time, shortly after Mr. Roosevelt came to the White House, the feeling about him was, if not distinctly hostile, certainly incredulous. It was expressed in sneers and criticisms and attempts at ridicule anent certain mannerisms and lack of tactfulness. This feeling was within the Republican party and was expressed by leading Republican senators and representatives. Gradually there came a change. Mr. Hanna's attitude was: "Mr. Roosevelt is our President and our party leader, and it is our duty to stand by him, to help him; to smooth out the rough spots, to give him time to get down to his work and show what there is in him."

One year and a half ago few public men believed Mr. Roosevelt could win a renomination. Now the man who believes there is doubt of his nomination without opposition is the exception rather than the rule.

A Story Worth Telling

We never tire of telling the story of Uneeda Biscuit. We do not believe that lovers of good, wholesome food ever tire reading it.

Unesda Biscuit are the result of two ideas. That soda crackers could be made better than they had ever been made before. That it was possible to convey them to the home fresh, crisp and clean.

The importance of the soda cracker as an article of daily consumption, made this worthy of extraordinary effort. True, many people laughed at the idea of so much thought-timelabor-capital, being devoted to a soda cracker. But the greatest industries of the greatest country in the world have been developed from smaller things than a soda cracker, and so it seemed worth while to make the best soda cracker that could be made and to place it on the table as good as it had been made.

To do the first required the selection of the best materials, of the best equipment, the highest skill. To do the second upset all traditions. The oldest bakers said there was no way to keep a soda cracker good.

That no one expected it any way. That people were satisfied to eat them stale, as they had been in the habit of doing. And so it fell to the lot of younger minds to do this unheard of thing—to keep a soda cracker good until eaten.

The result was the creation of the In-er-seal Package with red and white seal. An invention that kept out the air, moisture, dust germs, that first retained the natural flavor of the biscuit, keeping it crisp and fresh until it reached the table, and so Uneeda Biscult became a reality. The little thing that seemed hardly worth while became a great thing that seemed hardly possible.

To-day over 300,000,000 packages have been consumed by the thoughtful people of this country and the demand is ever increasing.

That is the story of Uneeda Biscuit. Some day we will tell it over again for the benefit of those who are still "satisfied" with the stale and broken crackers that come in a paper bag, when they can get Uneeda Biscuit

Thursday morning, though just arrived at midnight from a 28-hour trip from Vicksburg, they were out at the grounds working under McAleer and Padden.

The reason for the strenuous energy displayed by the Browns is that the season of spring games with the Cardinals is only two days from the starting point, and McAleer is growing nervous.

The Cardinal team, down at Dallas and Little Rock is in the best of the gross receipts, and the Yosemite Athletic Club 70 per cent, or \$20.000. Carroll offered \$30.000 for a fight in Havana in December, or \$25.000 for one in Atlanta in June.

If was decided to let the Yosemite club have the fight, but the matter of a percentage or lump sum is to be determined by May 15, when Jim Corbett will be here. Harry Corbett is temporary stake-holder.

The Cardinal team, down at Dallas and Little Rock is in the best of trim, after three weeks of fine weather in which to

three weeks of fine weather in which to get into shape.

With McAleer the backward weather has kept the team behind hand to a certain extent. The pitchers are in fair shape, with the possible exception of Powell; the infielders are all up to their jobs, though the batting eyes are below par; Burkett is in mid-season form, Hemphill a trifle fat, and Heidrick could not be better.

CARDINALS SUFFER DEFEAT.

Little Rock Wellops St. Louis Team in an Extra Inning.

pected under the circumstances. Padden's a thumb was injured in practice, but will hardly keep him out of the game.

Said McAleer Thursday morning, after his usual cautious style:

"We have no complaint to make, and are satisfied that we will be able to show our speed. It is sarly for our pitchers, but we can take a chance with them. I understand the Cardinals are cherry-ripe. From the way the Little Rock club took their scalps it appears they are over ripe." (Mr. McAleer may have meant rotten, but he did not so express himself.)

"As far as I can see now, the line-up for Saturday's game will be precisely that of last season. I may not make up my mind about the battery to be worked until game-time Saturday. So much depends on the condition of the men.

"Will we win? Well, we certainly never have gone into a game yet expecting to lose, and I see no cause for apprehension Saturday. Just say we are playing baseball like we did at the close of last season. That will about cover our chances for the series, I guess."

The sun of the last three days has put the grounds at American League Park in excellent condition for a game.

It has been decided that one staff um pire from each league will officiate in the games of the series. Hank O'Day and Sheridan are the probable choices.

Pitcher Frank Donahue, the only absence from the Brown's forces, is expected to put in an appearance Thursday. If Dnahue is in shape, he may be given a workout in the initial game.

CARDINALS SUFFER DEFEAT.

Wednesday afternoon, were as thick as files on a piece of sugar, but a bunch of errors sprinkled in spoiled the article of baseball which Patsy's braves served up to the Little Rock fans. It was an April fool joke, with the laugh on the Donovanites.

After several ineffectual attempts to defeat Umpire Carpenter, the Cardinal team went to pieces in the extra inning and gave one of the worst exhibitions of rattle ever charged against a major league team.

"Sunny Jim" Hackett occupied the box in that round, and pitched cleverly, but a trio of expensive errors gave the Arkansas team four runs and the game by a score of 9 to 5.

If we were either Umpire O'Day of the National League, or Umpire Sheridan, of the American League, we would contract a

sudden illness.

An untoward fate has marked them for

to have sense enough to avoid. This is earth which even a baseball umpire ought one of them. If Messrs. O'Day and Sheridan have never been in that critical posi-tion described as being between the deep sea and a certain party of questionable reputation, they will be there April 4. Accurate information has it that at least 15,000 fans will be present at the first game Saturday. Of these, 7500 will be for the Cardinals and the remainder for the

Which ever way the unfortunate umpire decides a close point, the chances are therfore 7500 to 1 that he will be wrong. We would like to ask what is the chance of his getting off the field whole? Terry McGovern wants another fight with

battle to the very round it ended in, but did not make a cent on his acumen. It is nes better to have an opinion than to back it.

Langerman Tells of Exciting Fight Between Sultan's Soldiers and Rebels in Morocco and of Loss of roo Men.

special to the Post-Dispatch.

NEW YORK, April 2.—James S. W. Langerman, United States vice-consul at Tangier and commissioner to Morocco for the St. Louis Exposition, has arrived here with a very interesting story of a battle, of which he says he was an eye-witness. He was the last man to leave Morocco before Eou Ham-Hamara, the pretender to the throne, invaded Fez.

"On the day that I left Fez." he said, "some two of three hundred rebels were brought in and nalled to the city gates. I had planned to return to Tangier, 15 miles distant, but had been warned that I would likely be molested by the rebels the moment i left the gates of Fez. I laughed at the fears of my advisers. The Sultan ordered a guard of 500 men to be sent with me.

THOUGH EXILED

Noble Chinese Girl Is to Study at University of California.

SAN FRANCISCO, April :.- Driven from her home in China, with a price set upon her head by the Empress Dowager, Miss Kang, daughter of a prince of noble blood, is coming to the University of Cali-fornia, there to obtain the education denied her in her native land. With the priceless gift of the knowledge of the West once obtained, this girl of the nobility will devote her life to the uplifting of her countrymen, who are still in the slavery from which she had fied.

reads like a romance from the pages of her own folk stories. She was born in the imperial palace of the Emperor, and is the daughter of Kang Yu Wel, one of the fore-most councillors of the potentate, who was deposed by the terrible old Dowager at the beginning of the Boxer movement. Her early life was one of hollow luxury such as is the lot of all noble Chinese

Unlike most of the women of her race, Miss Kang was educated in the Chinese classics, which comprise the sum total of all honorable things, according to the Mongolian idea. But the life of the girl student began to be surrounded by clouds, which finally broke in the bloody uprising of the Boxers.

Kang Yu Wel, her father, was one of the leaders of the new radical reform movement who was highest in the councils of the Emperor, Kwang Su. He advocated the sweeping measures of reform which brought the weak ruler to ruin and forced the outbreak of the conservative Boxers.

When the Emperor saw that all power had been gathered into the relentiess hands of the dowager and that the revolution was imminent, he warned his minister of the danger. Under cover of the night the former councillor, with his daughter, escaped from the palace and dropped down the river in a boat to the protection of the European consulates at Tien-Tsin. The next day his unfortunate associates in the radical movement at the palace were decapitated.

From Tien-Tsin Kwang Yu Wei and his

radical movement at the particle of the capitated.

From Tien-Tsin Kwang Yu Wei and his daughter departed from their native land, forever exiled and with thousands of taels set as the price of their heads. Since then the twain have wandered through Australia, India and Japan, always working for the cause for which they had suffered bandary.

ishment.

Now comes the daughter to take the course at Berkeley in order that she may return to her home when the tyrannical influence of the dowager is removed and disseminate her new-found knowledge for the good of the women of China. She is expected to arrive at the end of the present month.

FOLK LOVING CUP

To the Editor of the Post-Dispatch.

Enclosed please find 10 cents for loving cup fund for Mr. Folk. There is an element in St. Louis which wants to relegate him to the rear, and would drive him to take a long vacasion, broken in health and purse. Would not the people of St. Louis have ample reasons to hide themselves in shame if such was to happen?

St. Louis. A CITIZEN FOR JUSTICE.

In the Editor of the Post-Dispatch.

I heartily approve of the suggestion of Mr. C. L. Carson to raise a fund to purchase a loving cup for Mr. Folk, and herewith inclose my contribution to same. Let any one who believes in the honest administration of our city government evidence it by a contribution of any sum from 1 cent to \$1 to this loving cup for Mr. Folk, who stands as the incarnation of this idea.

St. Louis.

In behalf of the Post-Dispatch.

In behalf of the cause of good government and honesty in our municipal affairs, and to show our appreciation of his services, to encourage him in his noble efforts toward the purification of our city government, we, the undersigned, tender our humble contributions, amounting to 34.15, for the loving cup to be presented to the Hon. Joseph Folk by the citizens of 8t. Louis.
